

# User Story Mapping - GC

Printed from Asana

## Transfer Grading within School

- As a teacher, I want to have a student transferred into my class, so I can incorporate their previous grades into the rest of their school year.
  - Design - Import one or more students from another class
  - Design - Notify class owner that a student is being transferred
  - Backend - Reconcile duplications or differences
  - Backend - Get API updated for transferring
  - Front End - Acceptance or Rejection screen
  - Front End - Student fit into class
- As a teacher, I want to transfer a student from one of my classes to a different one of my classes, so they don't lose their previous work.
  - Design - Export one or more students to another class
  - Design - Menu of other teachers
  - Backend - Option to select one or more students
  - Backend - Get API updated for transferring
  - Front End - Confirmation screen
  - Front End - Student & teacher selection

## Grading Options

- As a teacher, I need a way to organize the grading to improve the efficiency & decrease the time spent on manual entry.
  - Backend - Ability to enter grade on all selected students for an assignment (fill-down)
  - Backend - Automatic labeling based on internal data (i.e., late if submitted after due date)
  - Front End - Grading organization buttons/options
  - Front End - Labeling
  - Design - Labeling & options look

## Transfer to PowerSchool

- As a teacher, I want to transfer all student grades from Google Classroom to PowerSchool
  - Backend - API to PowerSchool
  - Design - Transfer buttons & look

- Front End - Selection buttons
- Backend - Choice of one, multiple, or all assignments
- Front End - Confirmation Screen
- As a teacher, I want to transfer one student's grade and assignments from Google Classroom to PowerSchool.
  - Backend - API to PowerSchool
  - Design - Transfer buttons & look
  - Front End - Selection buttons
  - Backend - Choice of one, multiple, or all assignments
  - Front End - Confirmation Screen
  - Front End - Ability to choose just one student
- As a teacher, I want to transfer specific aggregate data from Google Classroom to PowerSchool.
  - Backend - API to PowerSchool
  - Design - Transfer buttons & look
  - Front End - Selection buttons
  - Backend - Choice of all assignments or some assignments
  - Front End - Confirmation screen
  - Front End - Ability to choose just one or all students
  - Front End - Option to select notes/comments
